Please approve the following revised search request as a rush search (Case is due this biweek, and there were problems associated with a previous search request for the same case):

Please search for any oligonucleotide sequence which is greater than 16 nucleotide residues that matches one of the following formula:

1/ 5'X1X2X3Pu1Py2CGPu3Py4X4X5X6(W)m(G)n 3'

wherein Pu1 or Pu3 is a purine nucleotide; Py2 or Py4 is a pyrimidine nucleotide; X1, X2, X3, X4, X5, X6, or W is any nucleotide; M is any integer from 0 to 10, and N is any integer from 4-10, and

wherein X1X2X3Pu1Py2 and Pu3Py4X4X5X6 are self complementary.

2/ SEQ ID NOS 1, 2, 13, 15, 16, 17-20

There are 10 sequences for this search request, which meets the limit as specified below.

Thanks,

Dave Trong Nguyen

Subject: RE: problem with search request for SN 10/068,160

Hi Dave,

A search you submitted for SN 10/068,160 has 19 sequences, which is longer than our limit of 10 sequences per search. Seq id #138 also is not listed under the serial number.

Your request has been cancelled. Please meet with one of the Examiner Screen Team, Jim Martinell, Scott Priebe, Jeff Fredman, or Mike Pak. One of them will review your search request and will offer suggestions for modifying the search to optimize the processing time. Once you and he have met and made appropriate changes, please resubmit the search request so we can process your request immediately.

If you have any questions about this, please contact Mary Hale, Supervisor, Information Branch, 2-2507.

Thank you,

Mary Hale
